

SIBELCO

CERAMIC BODIES FOR PORCELAIN

High-specification materials
for high-quality results

Leave **nothing** to chance

Porcelain manufacturing is a specialist process. To minimise defects and maximise productivity, you need premium-quality raw materials which meet tight specifications to deliver consistent results and offer real value in use:

We offer three types of ceramic bodies for porcelain:

- **white spray-dried (NEW)**
- **white crumble**
- **coloured spray-dried**

Examples from our **range**

Coloured spray-dried				White spray-dried
PC / Sand ISO SY	PC / Blue ISO SY	PC / Onyx ISO SY	PC / Green ISO SY	PC / HTA ISO SY
				
PC / Dune ISO SY	PC / Black ISO SY	PC / Pink ISO SY		PC / AL46 ISO SY
				

Quality & flexibility

We only use materials mined from our own mineral deposits, which are amongst the purest in the world. All our ceramic bodies are produced in-house using the very latest manufacturing technology.

Compared to other ceramic body providers, our approach brings several key benefits:

Secure supply

we don't rely on third party materials with fluctuating prices and limited availability

Quality at every stage

we carefully monitor quality from mining through production to end product delivery

Wide range of colours

state-of-the-art dry installations to allow us to produce a broad spectrum of colours

Customisable solutions

our flexible facilities enable us to co-develop bespoke materials to match your unique needs

Sustainability

using our own materials means less transport, whilst our crumble body uses less energy in production

Experience you can count on

At Sibelco, we have been supplying high-performance minerals to the ceramics industry for more than 150 years.

Combining an extensive portfolio of performance materials with in-depth technical know-how, we help our customers to overcome a wide range of production challenges to improve yield and margins and create higher quality ceramics.

The breadth of materials in our portfolio enables us to fulfil customers' individual needs with solutions that meet a diverse range of physical, chemical and functional requirements.

About Sibelco

Sibelco mines and processes industrial minerals at locations worldwide, focused primarily on silica, clays, feldspaths and olivine. We are also leaders in glass recycling.

With 120 production sites spread across 31 countries, we work across a broad range of industries, anticipating and meeting our customers' changing needs with innovative solutions that combine high-specification materials and dedicated technical support.
